Professional Summary

Full Stack Engineer at Laya Innovations, building web applications with React, Next.js, TypeScript, Node.js, NestJS and PostgreSQL. Previously a software development intern working on a production platform with React, Node.js, Express.js and MongoDB. Has been part of the whole process, from designing REST APIs and integrating AI services to deploying applications. A fervent developer who keeps learning, shares knowledge with teammates and keeps pushing engineering practices.

Technical Skills

Languages:	JavaScript, TypeScript, Python, C/C++
Frameworks & Libraries:	React, Next.js, Node.js, NestJS, Express.js, FastAPI, Socket.io
Database:	PostgreSQL, MongoDB, Prisma
Tools:	Git, GitHub, Postman, VS Code, Figma, Vercel, Render

Experience

Full Stack Engineer

August 2026 – Present

Laya Innovations, Kathmandu

- Developing full-stack web applications using React, Next.js, Node.js and PostgreSQL.

Software Development Intern

June 2026 – September 2026

Nexgen Data and Tech Consulting, Kathmandu

- Developed full-stack features for a production web platform connecting farmers, traders, and administrators, using React, Node.js, Express.js, and MongoDB.
- Implemented real-time functionality with Socket.io and integrated third-party services including Cloudinary.

Projects

mini-lovable: AI Website Builder

TypeScript, React, Express.js, PostgreSQL, Prisma, Stripe

mini-lovable-web.vercel.app | github.com/SanjeetaAcharya/mini-lovable

- Built an AI website builder where users buy a token balance, describe a site, and get it generated by an LLM and deployed to a live URL.
- Implemented usage-based billing that charges each generation by the tokens it actually used, recorded in an append-only ledger with transactional writes to prevent double spending.
- Integrated Stripe Checkout with webhook-confirmed, idempotent crediting, and automated deployment of generated sites through the Vercel API.
- Set up CI with GitHub Actions; deployed the frontend on Vercel and the API on Render with a PostgreSQL database.

Loan Default Prediction Application

React, Node.js, Express.js, FastAPI, MongoDB, Scikit-learn

github.com/SanjeetaAcharya/Loan-Default-Prediction

- Designed and implemented a three-tier architecture supporting real-time and batch loan risk predictions.
- Built a complete ML pipeline with data preprocessing, feature alignment, and multiple model evaluations for reliable predictions.
- Developed secure authentication and ensured seamless communication between services with proper data handling.
- Managed deployment across multiple platforms, addressing cross-origin issues, service downtime, and production inconsistencies.

Curriculum-Based Mentor and Mentee Connecting Platform

Flutter, Node.js, Express.js, MongoDB

github.com/SanjeetaAcharya/Nepal-Mentor

- Developed a role-based mentorship platform enabling structured interaction between mentors and mentees through dashboards and request management.
- Implemented backend features including authentication, request handling, and data management for mentor-mentee workflows.
- Integrated payment functionality and contributed to building a scalable and secure system for real-world usage.

Activities

- 24-Hour Hackathon on Sustainable Development (2025)
- AI/ML Bootcamp, Kathmandu Engineering College (2024)
- JavaScript Bootcamp, HPTech (2024)

Education

Bachelor in Computer Engineering

2022 – 2026

Kathmandu Engineering College, Kalimati, Kathmandu

Average: 77.15%

Higher Secondary Education

2019 – 2021

Kathmandu Institute of Science and Technology Secondary School, Kamalpokhari, Kathmandu

GPA: 3.43

Secondary Education

2015 – 2019

Boudha Secondary English School, Boudha, Kathmandu

GPA: 3.8
